PROFILE SUMMARY

Java Full Stack Developer with 4.5+ years of experience building and maintaining enterprise web applications using Java, Spring Boot, Angular, PostgreSQL, REST APIs, and AWS. Experienced in scalable backend services, multi-tenant applications, secure authentication, reusable Angular components, client-side caching, and application performance optimization. Hands-on experience with cloud migration, CI/CD workflows, observability, and modernization of legacy technology stacks.

TECHNICAL SKILLS

Backend	Java, Spring Boot, Spring Security, JPA, Hibernate, REST APIs, GraphQL, Microservices
Frontend	Angular 17, TypeScript, RxJS, Standalone Components
Database	PostgreSQL, Snowflake
Cloud & DevOps	AWS (EC2, RDS, ECS, S3, CloudFront, CloudWatch, Parameter Store), GitHub Actions, ArgoCD
Security	JWT Authentication, Refresh Tokens
Caching & Performance	IndexedDB, Client-side Caching
Monitoring	Datadog APM, RUM, Logs, Error Tracking
Tools	Git, GitHub, GitLab, Postman, IntelliJ IDEA, VS Code, Cursor

PROFESSIONAL EXPERIENCE

Java Full Stack Developer | WCS | Feb 2024 – Present | Hyderabad, India

Project: ZeroNorth – eBDN

Java 21 | Spring Boot 3 | Angular 17 | PostgreSQL | AWS | Datadog | ArgoCD | IndexedDB | JWT | GitHub Actions | Snowflake

Digital bunker delivery note application used by Cargo Officers during ship-to-ship fuel transfer operations. The application captures bunkering data and generates digitally signed BDN reports for submission to the Singapore Maritime and Port Authority.

- Designed and implemented multi-tenant data access in Spring Boot using AbstractRoutingDataSource, tenant context propagation, and dynamic datasource routing for tenant-specific data isolation.
- Developed and integrated Spring Boot REST APIs consumed by Angular applications to support end-to-end business workflows.
- Implemented IndexedDB-based client-side caching for frequently accessed data, reducing repeated backend API calls and improving offline usability.
- Contributed to migration of application infrastructure from on-premise VM infrastructure to AWS in collaboration with solution architects.
- Developed reusable Angular standalone utilities and shared UI components for validation, workflow indicators.
- Optimized Angular component rendering and API interactions, resulting in approximately 30% improvement in frontend performance and 50% improvement in scrolling performance.
- Implemented JWT authentication and refresh-token mechanisms for secure API access and session handling.

- Used Datadog APM, RUM, and logs to monitor application performance, investigate production issues, and identify bottlenecks.
- Supported CI/CD and deployment workflows using GitHub Actions and ArgoCD.

Assistant Systems Engineer | TCS | Nov 2021 – Oct 2023 | Bangalore, India

Project: British Telecom (BT)

Java | Spring Boot | GraphQL | PostgreSQL | AWS ECS | CloudWatch

Enterprise application development for British Telecom, focused on backend services, frontend integration, search functionality, reporting, and microservice communication.

- Developed and maintained REST APIs using Java and Spring Boot to support enterprise business workflows.
- Developed GraphQL queries and mutations for frontend integration and data retrieval.
- Integrated backend services with external microservices using REST APIs and GraphQL-based communication.
- Designed and implemented global search functionality supporting filtering across multiple attributes and datasets.
- Optimized report-generation workflows using asynchronous processing, materialized views, and database query optimization to improve application response time.
- Collaborated with frontend developers to design APIs and backend workflows aligned with application requirements.
- Monitored AWS ECS tasks through CloudWatch logs, investigated production issues, and supported deployment troubleshooting.

OPEN SOURCE

- Published Angular NPM package, required-field-marker, for reusable form-field validation and error indication.

EDUCATION

B.Tech — JNTUA College of Engineering, Pulivendula | 2021

Intermediate — Narayana Junior College | 2017

SSC — Raviteja EM High School | 2015
